

12.07.2026 - Digital Future Hackathon

BUS **FACTOR**

**See who from your team moves with AI —
and scale it with agents.**

AI Has Already Changed the Math of Work

30%

AUTOMATED HOURS

of current work hours could be automated by
2030

42%

TIME SAVED

of regular AI users already save a full workday per
week

**AI is already creating a productivity gap between people who use it well —
and people who do not.**

AI Spend Is **Exploding** . ROI Is Not.

\$2.59T

GLOBAL AI SPEND

Forecasted in 2026.

\$40B

ALREADY INVESTED

By enterprises.

95%

ZERO MEASURABLE RETURN

Received by organisations

5%

OF PILOTS

Extract millions in value.

AI budgets are growing faster than proof of impact.

How **BUS FACTOR** Works

Who is working at 20% because they ignore AI?

Who is working at 5x because they mastered it?

We show the gap and turn 5x workflows into agents.

01 / CONNECT

Connect AI + work tools
Slack, Jira, Gmail

02 / VISUALIZE

See who moves with AI

03 / IDENTIFY

Find teams falling behind

04 / AUTOMATE

Turn best workflows into agents

05 / SCALE

Scale AI leverage across firm

PLATFORM OUTCOME

- ✓ AI leaders identified
- ✓ Slow workflows detected
- ✓ Agents deployed

Live Prototype

<http://34.116.247.93:8069/ai-usage/public>

Business Model

Unit Economics

Core Pricing:

\$10 / employee / month

Infra Cost:

\$1.20–2.10 / employee / month

Gross Margin:

79% - 88% at scale

Example 1 — Mid-Market

500 Employees → \$60K ARR

Example 2 — Enterprise

2,000 Employees → \$240K ARR

Upsell Layer

AI Agents

Autonomous digital workers

Automation Packs

Pre-built pipeline triggers

AI Work Needs a Management Layer

\$6.5–8B

TAM

AI leverage management for
knowledge-work companies

\$1.5–2B

SAM

Tech and IT-service
companies in US, UK, EU
and CEE

\$20–35M

ARR SOM

300–500 customers in 3
years

MARKET SIGNAL

Enterprise GenAI
spend reached \$37B in
2025.

Workforce analytics is
growing toward \$6B+
by 2031.

TAM/SAM/SOM are bottom-up estimates based on
target company count × expected annual contract value.

Who Feels This **Pain First**

TARGET SEGMENT

**Mid-market Tech
& IT-Service
companies**

200–2,000 employees

THE PAIN

Already paying for AI tools.

Already under pressure to prove productivity gains.

Already seeing the gap between AI power users and slower teams.

BUYER & TRIGGER

Economic Buyer

CEO / CFO / COO

Best First Trigger

AI budget review or productivity push

6 Months to Validate the Market

Action-oriented phases to discover scale before burning capital

01

MONTH 1

Ship

MVP live + first design partners to anchor product requirements.

02

MONTHS 2-3

Prove

Validate core product value utilizing real company data.

03

MONTHS 3-5

Sell

Founder-led acquisition across strategic ICPs and key markets.

04

MONTH 6

Scale

Turn on paid acquisition channels only where conversion is proven.

THE ULTIMATE GOAL

Find the ICP, country, message, and sales motion that convert — **before spending on marketing.**

Be a Part of the **AI Transition**

Some teams will move at **5x** speed.

Some will stay behind, stuck in traditional slow workflows.

Bus Factor helps companies navigate and choose the first path.
